Changes to this syllabus will be provided via the ELearning/Sakai platform. Such changes may include those required by policy changes, instructor travel, changes in the speed of course coverage, university closure, errors in previous syllabus versions, and other reasons.

1. Description:

Nuclear applications of fluid mechanics, heat transfer and thermodynamics. Two-phase flow and boiling heat transfer. Heat transfer mechanisms in reactor core and sub-channel thermal hydraulics. Steam generator, power cycles, balance of plant. Introduction to thermal design for reactors.

2. Prerequisite:

EML 4140 + (EGN 3353C or ENU 4133)

3. Program Educational Objectives Supported by Course

n/a (graduate course)

4. Professional Components Supported by Course

n/a (graduate course)

5. Program Outcomes Supported by Course

n/a (graduate course)

6. Instructor

DuWayne Schubring, Assistant Professor
205 Nuclear Sciences Building
352-392-1401 x314
dlschubring@ufl.edu
Web: Sakai
Office hours: TWR 1400-1500, by e-mail, and appointment. Due to other meetings I attend/host, please note that office hours begin at 1400, not 1340 or 1355.

7. Teaching Assistant:

Oswaldo Pelaez
122A Nuclear Sciences Building
colomeriano89@ufl.edu
Office hours: MW 1500-1600
Note: the TA will grade a subset of the course material, but all regrade requests go to the instructor.

8/9/10. Course Meetings:

TR, 1040-1235, “Periods” 4 and 5. CSE E118. Final Exam: December 11, 1530-1730
11. Material and Supply Fees:
none

12. Text (Required):

To complete some of the homework and projects in this course, access to a programming/scripting language such as MATLAB, FORTRAN, C, C++ (etc.) and a spreadsheet application will be required. Property look-up software, such as EES, is strongly recommended, though not strictly required.

13. References

2. Any undergraduate textbooks (typically aimed at mechanical engineering students) on thermodynamics, fluid dynamics, and heat transfer. _Fluid Mechanics_, F. M. White (7th edition) was the text for ENU 4133 and is recommended.

3. As the steam tables in T&K are not particularly comprehensive, especially in SI units, you’ll want access to better ones. These could be found in previous textbooks or via software.

14. Course Outline

The course is organized into 15 modules. The materials for each module are in separate folders on the course website. The lecture time for each module, in addition to exam/homework/project coverage, varies considerably.

These modules are (# of lecture hours) [Reference]:

1. Nuclear Applications of Fluid Mechanics and Heat Transfer (3) [T&K, Sections 9.6, 10.5.1.1.3]
2. Averaging in Two-Phase Flow (2) [T&K, Sections 5.1 through 5.4]
3. Transport in Two-Phase Flow (2) [T&K, Sections 5.5 through 5.7]
4. Homogeneous Equilibrium Model (2) [T&K, Sections 11.1 through 11.4, 11.5.2]
5. Separated Flow Model and Void Fraction Correlations (3) [T&K, Section 11.5]
6. Pressure Loss in Two-Phase Flow (5) [T&K, Section 11.6]
7. Flow Regimes in Two-Phase Flow (4) [T&K, Section 11.2]
9. Boiling Heat Transfer – Correlations (3) [T&K, Section 13.3]
11. Nuclear Heat Transport (3) [T&K, Sections 3.1 through 3.6.1, 3.9, 8.1 through 8.3, 8.5, 8.7]
12. Single Channel Analysis (SCA) Methods (5) [T&K, Chapter 14]
13. Critical Flow (4) [T&K, Section 11.7]
14. Nuclear Power Cycles (4) [T&K, Sections 6.1, 6.3 through 6.7]
15. Thermal Design Principles (2) [Lecture/discussion only – no separated set of notes]
Modules 1-14 are supported by online lecture notes. Since T&K is primarily a graduate-level textbook with relatively few organizational similarities to ENU 4134/6937, these notes are intended to distill the keys points of the modules for use in this class. Particularly for modules 12 and 14, these notes will likely form your primary study material.

Finally, a “Module 0” is provided, as online notes and examples only (no lectures), to address topics in Gas Dynamics that were skipped in some ENU 4133 offerings. You should review this material at your convenience, but prior to Module 13.

Exams
1. Modules 1 through 7
2. Modules 8 through 12
3. Comprehensive, some focus on Modules 13-15

Projects
1. Application of the Separated Flow Model for Pressure Drop Analysis (Modules 5 and 6)
3. Thermal Hydraulics Literature Review (ENU 6937 only)

Homeworks
1. Nuclear Applications of Fluid Mechanics and Heat Transfer
2. Averaging in Two-Phase Flow
3. Homogeneous Equilibrium Model
4. Separated Flow Model (Void Fraction Correlations)
5. Pressure Loss in Two-Phase Flow
7. Boiling Heat Transfer (Part 2)
8. Nuclear Heat Transport
9. Critical Flow
10. Nuclear Power Cycles

The day-by-day outline must be understood as a draft. Lecture coverage may move forward or back, as necessary. Homework and project deadlines will not be earlier than listed, but may be later. Exam dates will not change (excluding university closure).

15. Attendance and Expectations

Attendance & Class Conduct

Skip at your peril. Attendance is not considered in the grade. However, some materials in the course will not be covered in the textbook or in the notes provided online – only in class. Some example problems and complex figures (hard to digitize, easy to make on chalkboard) fall into this category. Students are responsible for these materials.

If a student arrives late or leaves early, he/she is expected to do so with minimum level of disruption to the class in progress. There is no tolerance for mobile phones or other electronic disruptions. Such disruptions will lead to the student being told to leave the room for the duration of the class period, including during examination periods. The same principle applies to office hours or appointments – if you stop by my office and your phone rings, you will be told to leave the room for the duration of that day’s office hours (or your appointment considered over).
Make-Up Work Policies

Absences can be grouped into the categories of professional, medical, and personal.

Professional: Reasonable extensions for job/internship interviews, technical conferences, or other professional/career development reasons should be requested. Requests are typically granted, at instructor’s discretion, unless they would grant a student or group of students an unfair advantage over their peers, cause significant disruption to the course or grading schedule, or violate some UF policy.

Medical: Extensions will also be granted for (your own) medical reasons – please do not come to class if you are ill. Per UF policy, in the case of medical absences that are frequent or suspiciously-timed (e.g.; you are repeatedly, suddenly ill at deadlines), the instructor may request a signed note from a physician or similar professional practitioner.

Personal: In addition, UF policies require accommodation for several non-academic, non-medical reasons. Extensions for these personal issues are strictly limited to those mandated by the letter of UF policies. UF-authorized extensions include UAA competitions, religious observances, and serious illness or death of specified relatives. There is no single document listing all UF-approved personal reasons for absence/extension; further, the list of reasons changes from time to time. If you have a question regarding your personal issue and if it qualifies under one of the excused absence policies, contact the instructor in advance.

Homework

Homework will collected at the beginning of the class period at which it is due. All homework assignments will require submission of hard copy. No type of paper or writing utensil is preferred over others (within reason). You must include your full first and last name on all homework (as well as projects and exams).

Direct electronic submission of files used on homework (spreadsheets, etc.) may be required for some assignments, as indicated on the assignment sheet. The allowable level of collaboration on homework assignments may vary throughout the course and is indicated clearly on each assignment.

Homework handed in after the release of solutions (as early as 8 am the Monday after the due date) will receive no credit. Homework handed in between the due date and the release of solutions is worth 50% credit. If your homework is late, the onus is on you to provide it to me; the clock does not stop until I have homework in hand.

In addition to the required homework assignments noted above, recommended homework problems will be given during the semester. You will be responsible for the technical content of these homework problems (i.e., they may contribute knowledge needed to perform well on projects or exams), but will not be included in the grade. Solutions to both required and recommended homework problems will be provided.

Projects

Electronic submission of project narratives is not accepted. Electronic submission of other project components follows the same rules as for homework. You will need to collaborate with and divide labor among the members of you team, but no collaboration among teams is permitted.

Late projects will lose 10% of their value each calendar day, rounded up (so 3 hours late is considered 1 day late). Projects 4 or more calendar days late have no value. If your project is late,
the onus is on you to provide it to me; \textit{the clock does not stop until I have project in hand.}

Certain professional document and figure standards will be enforced on these projects; \textit{the onus is on you to figure out how to meet these standards in whatever programs you use to write the document and make figures}. Your instructor has little sympathy for those who select a word processor without knowing how to format their text using it – complaints that the standards are not the same as a particular piece of software’s defaults will fall on deaf ears.

All projects are to be done in groups. The instructor will assign the groups. A peer review system is in place to assure equitable workload. In the event the workload is not equitable, the instructor reserves the right to adjust individual grades to accurately reflect contributions to the work.

\section*{Examinations}

For each exam, you will receive an Exam Preview, intended to prepare you for taking the exam (both technically and procedurally). Detailed examination (including grading/curving) policies are included on this document. The preview will also include the specific topics addressed by the problem (for most problems), the way points are distributed among problems, and a brief list of topics within the scope of the exam.

Examinations are due at the end of the examination period. No collaboration is permitted during examinations, although you may prepare for these however you choose. Use of any unauthorized materials or any communication (including mobile phones, laptops, or face-to-face with classmates in the room) is grounds for \textit{immediate and final} collection of your exam with no more work permitted and any work already completed that, in the instructor’s judgement, was aided by said materials/communication not considered in grading. Examinations consist of two stages: a closed-book/note conceptual and open-book/note problem solving.

\section*{File Formats}

The electronic components of homework submissions \textit{must} be in the formats requested. If you do not know how to convert your files to these formats, contact the instructor in advance of the deadline. Not knowing your software is not an excuse for late homework. Acceptable formats may include plain text, .pdf, .csv, .xls, and EES files, as well as other file formats at the instructor’s discretion.

In particular, the instructor will not open files from students in the following formats: .xlsx, .ppt, .pptx, .doc, .docx. Presentation and word processing documents are best converted to .pdf. Spreadsheets can be converted to .xls or .csv.

\section*{E-mail}

The primary means of communication with the class outside of class time will be e-mail listserv. These listservs (1 for on-campus 4134, 1 for EDGE 4134, 1 for 6937) will send to your @ufl.edu address only. Any inquiries regarding grading will be directed towards your @ufl.edu address only, per FERPA compliance regulations.

Technical and procedural questions will be answered as a reply to whatever e-mail address you used to send them. If the entire class will benefit from the answer, I may send to the class list (either in lieu of or in addition to a direct reply to you, at my discretion). If you do not wish to
have a specific e-mail to me regarding technical content or course procedures replied to through the class list, you must explicitly state this in that e-mail. In such a case, I will reply directly to you and send a general-purpose announcement to the class list, not indicating who caused me to send it.

ENU 4134 vs. 6937

The undergraduate (ENU 4134) and graduate (ENU 6937) share common lectures and a fraction of common coursework.

Letters of Recommendation/Evaluation Policy

To request a letter of recommendation/evaluation (for graduate school or otherwise), you must provide:

- A hard copy of your UF transcript.
- A hard copy of a résumé (or CV).

Letters are typically filed once per week. For students whom I know only through coursework, my letter typically focuses on an estimate of their rank-in-class and on their performance on projects and challenging problems.

New policy, effective Fall 2013: I will only file one batch of letters per student during the term, for any student currently enrolled in a class with me. (This policy is designed to keep me from looking up slight changes in your rank/performance multiple times for multiple batches of letters.) Given the schedule of ENU 4134, I recommend that this batch occur not earlier than late November (after Project 2 and Exam 2) to allow me sufficient information (sample size) on your performance to write a useful letter.

16/17. Grading

There are 1050 total points in the course.

- Exam 1 (150)
- Exam 2 (150)
- Exam 3 (150)
- Project 1 (150)
- Project 2a (50)
- Project 2b (150)
- Project 3 (graduate only) (50) [graduate only]
- Homework (200 – best 8 of 10 assignments, 25 each)

1 examination point = 1 homework point = 1 project point

Exam 1 and Exam 2 will be curved to produce an average of 115 for undergraduate students (prior to any regrades). The details of this curve and how graduate (6937) students will be affected are included as part of the Exam Previews. The final grades will be assigned based on:
A: 900+
B: 825-899
C: 725-824
E: 0-724

The instructor reserves the right to grant higher grades at the end of the course at his sole discretion, including the use of A-, B+, B-, and C+.

Typically, the average GPA in ENU 4134, including graduate students in ENU 6937, is between 3.0 and 3.2.

Under no circumstances will grades of C- or any flavor of D be used.

The following statement is required by COE policy: “In order to graduate, graduate students must have an overall GPA and an upper-division GPA of 3.0 or better (B or better). Note: a B-average is equivalent to a GPA of 2.67, and therefore, it does not satisfy this graduation requirement. For more information on grades and grading policies, please visit [http://gradschool.ufl.edu/catalog/current-catalog/catalog-general-regulations.html#grades](http://gradschool.ufl.edu/catalog/current-catalog/catalog-general-regulations.html#grades)

18. Make-up Exam Policy

The make-up exam policy is covered by the Make-Up Work Policy in Item 15. All make-up exams will be held after the regular exam, as organized with the TA and authorized by the instructor. Note that conflicts in TA-proposed make-up times with your personal business will not, in general, be accommodated.

19. Honesty Policy

All students admitted to the University of Florida have signed a statement of academic honesty committing themselves to be honest in all academic work and understanding that failure to comply with this commitment will result in disciplinary action. This statement is a reminder to uphold your obligation as a UF student and to be honest in all work submitted and exams taken in this course and all others.

Addendum to 19: Violations of UF Academic Honesty policies in this course will be reported through appropriate channels. If you choose to commit academic misconduct in this course, expect to receive a failing grade for the course.

20. Accommodation for Students with Disabilities

Students requesting classroom accommodation must first register with the Dean of Students Office. That office will provide the student with documentation that he/she must provide to the course instructor when requesting accommodation.

21. UF Counseling Services

Resources are available on-campus for students having personal problems or lacking clear career and academic goals. The resources include:
• UF Counseling & Wellness Center, 3190 Radio Rd, 392-1575, psychological and psychiatric services.
• Career Resource Center, Reitz Union, 392-1601, career and job search services.

22. **Software Use:**

All faculty, staff and student of the University are required and expected to obey the laws and legal agreements governing software use. Failure to do so can lead to monetary damages and/or criminal penalties for the individual violator. Because such violations are also against University policies and rules, disciplinary action will be taken as appropriate. We, the members of the University of Florida community, pledge to uphold ourselves and our peers to the highest standards of honesty and integrity.
